1991: A Space Oddity
hypnotherapist needed for Oregon abductee
Appointment

Hi Linda.

Well, I've read a bit about Nicola Tesla and his contemporaries and inventions, but I haven't run across anything that indicates Tesla was receiving signals from Tau Ceti. He did say many times that he was receiving scalar-electromagnetic signals from either the moon or Mars, however. It's a touchy subject, because we still don't have especially good scalar sensing equipment. So it's hard to verify.

Tesla wasn't the only one to feel he was getting stray signals from space, you know. Marconi's people in England felt the same way and took elaborate steps to try to intercept more signals.

I have a file around here somewhere that describes some of the efforts made at Marconi's English research facility in the 1920s. Tesla, as far as I know, never got the funding to attempt to detect the source of his "signals".

Best,
Clark

Hi again, Linda. Just found a very interesting file by an astronomer re: Constructions observed on the Moon. I'll advise you of the file name & make it available on ParaNet & KeelyNet when it's typed up.

There have been many such observations over the last 100 years, often lasting several months. In fact, a famous Mexican astronomer observed disks traveling against the face of the moon over 100 years ago! Moreover, similar constructions pop up time & again, like prefabs.

I'll let you know the file name.

Best,
Clark

Anyone knowing of a reputable hynotherapist in the Newport, Oregon area
please post a message for Sheldon Wernikoff.
I have been corresponding with a woman who has experienced very extensive
periods of missing time over the past ten years, and is now wishing to
explore further.
